

Strike Lane Primary School

Drug, Alcohol & Tobacco Education Policy

Review Date		
	Sept 2018	JB
	May 2022	JB

Introduction:

Strike Lane Primary School is committed to the health and safety of its pupils, staff and families and will take action to safeguard their well-being. We will actively discourage the use of illegal substances, alcohol or tobacco and the misuse of glue, solvents, prescribed and over-the-counter medicines. We acknowledge the importance of our pastoral role in the welfare of young people and through the general ethos of the school, will seek to enable pupils needing support to come forward. Research has shown that by the age of 11 many primary school children have extensive knowledge of the world of drugs. For some, this knowledge may be inaccurate and incomplete, for others it will develop through personal experience. Research shows that up to 50% of children have tried an illegal drug by the age of 16. The figures also suggest that the first age of experimentation is decreasing and that children of primary age are exposed to opportunities to try both legal and illegal drugs. The 1995 white paper 'Tackling Drugs Together' stated that schools had an important role both in reducing the misuse of drugs and minimising their health risks. Drugs education should contribute to:

- Increasing the safety of communities from drug related crime
- Reducing the acceptability and availability of drugs to young people
- Reducing the health risks and other damage related to drug misuse

At Strike Lane Primary School we believe that drugs education should provide:

- Accurate information presented simply and clearly
- Informative and accessible reading materials
- Access to other adults besides teachers, providing they are expert and credible
- Stimulating and enjoyable classroom tasks
- Opportunities to develop their knowledge and understanding in a challenging and safe atmosphere where they feel secure enough to play a full and active part.

We aim to provide a consistency of approach throughout the school and to encourage children to develop knowledge and skills to make informed and responsible choices now and in later life and to stress the benefits of a healthy lifestyle. At Strike Lane Primary School we encourage children to develop positive attitudes and values and to ensure that Health

and Safety procedures are followed when dealing with incidents/equipment related to drugs and drug use.

Purpose of the policy:

- To develop children's personal and social skills including refusal and decision making skills
- To help children take increased responsibility for themselves and their actions.
- To encourage children to value themselves and others.
- To encourage children to help and support others.
- To encourage children to work cooperatively in active learning and group work.
- To clarify what children already know, give information to clarify facts and correct false knowledge and beliefs.
- To help children deal with the effect of media coverage of issues relating to drugs.
- To support staff in dealing with issues and incidents relating to drugs and drugs use.
- To ensure all staff are aware of procedures relating to drugs and drug use at Strike Lane Primary School.
- To provide opportunities for pupils to acquire knowledge and identify the distinction between authorised and unauthorised drugs.
- To develop and equip pupils with the knowledge, attitudes and skills necessary to build their resilience and avoid peer group pressure or unwanted drug offers from others.
- To build pupils' decision-making skills and increased self- esteem
- To develop a whole school approach to drug education in the context of the school curriculum Key roles and responsibilities

Headteacher: Katherine Shuttleworth

RHE Co-ordinator: Joanna Bamber

Designated Safeguarding Lead: Katherine Shuttleworth

Deputy Designated Safeguarding Lead: Simon Moulding and Joanna Bamber

Inclusive definition of drugs:

We define a drug as a substance that, when taken into the body, changes the way we feel, the way we perceive things, and the way our body works. This definition includes illegal substances and also legal substances such as alcohol, tobacco, solvents and medicines.

Rationale/key principles:

It is our aim to help all pupils to be able to take their place safely in a world where a wide range of drugs exists. We recognise that some drugs have beneficial effects, but also that every drug has potential harm. For this reason, all drugs need appropriate and responsible care and management. In order to be able to make informed choices, staff and pupils need to understand the nature of drugs, their social status, their uses and effects. Boundaries, including relevance of the policy to school trips and visits The legal definition of premises of the school includes everything within the property boundaries including buildings, outbuildings, playgrounds, fields and also extends to include other settings such as vehicles or any venue managed by the school at the time of e.g. premises of a school trip or visit. The policy will also relate to pupils use of the premises and grounds beyond the school day.

Drugs Education Context:

We will provide all pupils with drug education as an integral part of our Relationship and Health Education (RHE) programme. There will also be opportunities for teachers, parents and governors to participate in drug education sessions. These sessions will be a result of collaboration between the school and various support agencies.

Ethos:

Drug education in our school aims to enable pupils to make healthy informed choices by increasing their knowledge, exploring a range of attitudes towards drug use and developing and practising decision making skills. The programme we follow is based on national and local guidelines for good practice and is appropriate to the age and experience of our pupils.

Content:

It is felt that drug education should start at least two to three years before the likely age of experimentation. Drug issues will be reinforced throughout the child's education, matching their increasing understanding and maturity. Key Stage 1 Children should be introduced to ideas about how to keep healthy and the role of drugs as medicines. Key Stage 2 Children should be introduced to the fact that whilst all medicines are drugs, not all drugs are medicines. They should also begin to be aware of the harmful effects on health of abuse of tobacco, alcohol and other drugs. In line with these proposals drug education will be taught as part of the RHE programme. This will be either within class topics or be specifically taught as and when appropriate. The drug education programme will provide opportunities for pupils to:

- Explore attitudes and values around drug misuse.
- Practise decision making skills.
- Become aware of peer pressure

- Develop assertiveness skills
- Consider the consequences of risk taking
- Learn how to access sources of help and information
- Emphasise the benefits of a healthy lifestyle
- Evaluate media messages on drug use

Use of visitors and outside agencies:

Outside agencies may be involved in the planning and teaching of the drug education programme and will be asked to adhere to our school policy. We use visitors to support our planned teacher lead programme of education, in line with national and local guidance. The class teacher is always present when visitors are working with our pupils.

Managing Drug Related Incidents Pupils, staff and visitors to the premises are made aware of the school's drug policy.

Routine arrangements:

- Medicines - The school has a procedure for the administration of medicines that must be followed for everyone's safety.
- Alcohol - No alcohol will be consumed during the course of a normal school day. Alcohol is not permitted on the school premises except by the permission of the Headteacher. Any adult under the effects of alcohol will be asked to leave the premises for the safety of the whole school.
- Tobacco - The school and its grounds are no smoking areas at all times. Pupils are not permitted to bring to school smoking materials, including matches and lighters. In the interests of health and safety, should a pupil be found in possession of any of these on school premises, they will be confiscated
- Solvents - The school will ensure that potentially hazardous substances are stored safely, and pupils will be supervised if it is necessary that they come into contact with them in the course of their work. Pupils are not permitted to be in possession of products such as solvents and aerosols. (The only exception permitted is aerosol Ventolin / any other approved medicines administered in the presence of an adult and stored in a medicine cupboard.)

- Illegal drugs - No illegal drugs are allowed to be brought on to, or used on school premises. To protect the health and safety of the school community regular checks will be made of the site to ensure that drug paraphernalia, particularly needles and syringes, are cleared away safely and legally.

Incidents

A drug related incident may include any of the following:

- Finding drugs or related items on school premises
- Possession of drugs by an individual on school premises
- Use of drugs by an individual on school premises
- Supply of drugs on school premises
- Individuals disclosing information about their drug use
- Rumours or reports of drug possession supply or drug use.

Guiding principles

The school is aware of its legal responsibilities in regard to drug related incidents and in responding to them. The School's first responsibility is for the welfare of the individual, balanced with the need to protect the community as a whole. The Headteacher will normally be responsible for coordinating the management of drug related incidents, offering sources of support and liaising with outside agencies. The school acknowledges the importance of its pastoral role and will support all concerned in ensuring the well-being of its pupils. Parents will be encouraged to become involved as much as possible in order to achieve a successful drugs education programme.

Procedures

- Medical emergencies

If an individual is unconscious, is having trouble breathing, is seriously confused or disorientated, has taken a harmful toxic substance or is otherwise at immediate risk of immediate harm medical help will be sought and first aid given if required. The priority will be the pupil's safety.

- Hearsay/Rumour Drug use is often discovered by hearsay. This should be passed on to the Headteacher and Designated Safeguarding Lead, who should record the matter as hearsay evidence, thus enabling a record of teacher's concerns to be compiled.

- Suspicious Behaviour

Behaviour that could indicate involvement with drugs should also be logged so that patterns of behaviour can be observed and concerns acted upon where necessary.

- Finding substances

If a substance or equipment thought to be either illegal or harmful is discovered it should be removed to a place of safe keeping in the presence of a witness from the teaching staff. If the substance is known or suspected to be illegal the police must be informed. If a substance is found on a pupil the above procedure should be followed and the incident recorded including:

- The date and time of the find or retrieval
- The size and appearance of the substance
- The names of those concerned
- The action taken

Any equipment associated with drug misuse should be handled with care, recorded and in the case of such items as needles and syringes, should be placed in a secure and rigid container for collection by the appropriate person. If these are found on a pupil, the pupil's parents should be informed.

- Searching storage areas within the school grounds are the property of the school, and the Headteacher, or her representative may authorise a search of these if there is reasonable suspicion. This must be carried out in the presence of a witness and the named pupil if this applies. Staff should not search a pupil's property or person but should try to persuade the pupil to voluntarily produce the substance by asking to turn out pockets, or bags. If it is absolutely necessary to search a pupil a police officer will be required, and parents informed as soon as possible. The police officer will only be able to carry out a search if there are reasonable grounds to suspect the pupil is in possession of an illegal substance.

- Finding Drugs

If children are found in possession of tobacco, alcohol, glue, solvents or prescribed or over-the counter medicines, parents will be informed and appropriate steps taken. In an

emergency arising from an incident involving abuse, the well-being of the pupil is paramount.

In all instances:

- separate the child involved from the rest of the group.
- decide and implement the next best step in terms of the child's welfare.
- inform parents.

Supply of illegal substances:

It is an offence to produce or supply any controlled drug on school premises. The police will be involved in such circumstances.

Returning articles which have been confiscated:

Articles confiscated and not required by the police must be returned to parents. They will be informed in writing within 24 hours of articles confiscated and an explanation given as to why it is inappropriate to return the article to the child. It will be made clear that there is a time limit of one week for the items to be recovered or they will be disposed of by the school.

- Recording all incidents will be recorded within 24 hours.

Confidentiality:

Complete secrecy can never be promised to a pupil, though information given in confidence will not generally be disclosed to anyone else. If a pupil chooses to disclose that they are using a drug without medical authorisation, particularly when seeking support, this information will not be used against them notwithstanding any illegal / controlled substances. However action will be taken to ensure that the pupil comes to no serious harm if this is considered a significant risk. Staff has a commitment to inform the pupil in advance of any disclosure of information to others and if possible enable the pupil to be involved in the process. Staff are committed to protect a young person's anonymity where their information may implicate others.

Staff Training and Support:

We recognise the need for staff to receive appropriate training to support their work in delivering the school programme of drug education and dealing appropriately with incidents should they arise. The Headteacher, or other appropriate member of staff, will organise training related to the identified needs of staff as required. All staff need to understand and support the rationale and aims of drug education and be aware of the legal implications and their responsibilities.
